WORK EXPERIENCE

December 2025 – March 2026

Frontend Developer Intern | Kromaticos

Multi-LLM Platform & AI Generation Hub Development:

- Designed and developed a centralized web application to orchestrate queries across multiple Large Language Models (LLMs) and image generation engines within a unified interface.
- Implemented a global state architecture using Next.js, React, and TypeScript, enabling seamless switching between AI models while dynamically preserving chat memory context.
- Built responsive, interactive UI components using Tailwind CSS, significantly reducing context-switching friction across fragmented AI tools.

April 2026 – October 2026

Full-Stack Developer Intern | UCV Extension Coordination

Course Registration System & Automated Database:

- Architected and deployed a transactional serverless web application (zero operating cost) for UCV's Faculty of Sciences, automating student registration and payment reporting workflows.
- Engineered the backend using Google Apps Script with Google Sheets as a relational database and Google Drive API for secure voucher storage, speeding up administrative reconciliation.
- Built a high-performance responsive SPA in native HTML5/CSS3/JavaScript, ensuring cross-platform accessibility and instant load times without heavy external dependencies.

EDUCATION

2023 – Present

Bachelor of Science in Computer Science (8th Semester)

FACULTY OF SCIENCES - CENTRAL UNIVERSITY OF VENEZUELA (UCV)

SKILLS & TOOLS

- **Frontend:** React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Figma
- **Backend:** Node.js, Express, Python, Django, Java, C++, REST APIs
- **Databases & DevOps:** SQL Server, PostgreSQL, Docker, Git, GitHub, Postman

LANGUAGES

- Spanish — Native
- English — B2 Level (Certified by Centro Venezolano Americano - CVA).
- Portuguese — Basic
